

Company Profile 1: TechSavvy SMB (Technology Industry)

Quality	Function ID	Function Name	Function Description	Function Outcome
Excellent	RC.IP-1	Identify Critical Technical and Non-Technical Assets	TechSavvy SMB must conduct a comprehensive discovery exercise to identify their critical technical and non-technical assets. Technical assets include but are not limited to data centres, hosting, servers, databases, data, software, models, and services. It is important to include 'service' as a whole because some services are more important than others. Non-technical assets include but are not limited to people, processes, and technology. For example, it is crucial to identify critical business processes, such as the Intellectual Property (IP) of the company, understand how it is safeguarded, how it can be reproduced in the event of a disaster, cyber incident, or attack, and identify any safeguards and potential weaknesses in those safeguards (see also RC.CC-1).	List of Technical Assets for TechSavvy SMB: - Data Centres: Local data centre at headquarters. - Hosting Services: Cloud hosting services provided by AWS and DigitalOcean. - Servers: 10 physical servers and 50 virtual servers. - Databases: Customer and product databases hosted on MySQL. - Data: Customer data, product data, sales data, and analytics data. - Software: CRM software, accounting software, custom-built inventory management system. - Models: Sales forecasting models, inventory optimization models. - Services: Managed IT services, cloud services, technical support services. - Networking and Infrastructure: Office network infrastructure, Wi-Fi routers, VPN services. - Security Assets: Firewalls, antivirus software, encryption tools. - Development Tools: IDEs (e.g., Visual Studio Code), version control systems (e.g., GitHub), CI/CD pipelines. - Communication Systems: Email servers, collaboration tools (e.g., Slack), VoIP phone systems. - Compliance and Regulatory Reporting Systems: Systems for monitoring GDPR compliance. - Business Continuity and Disaster Recovery Systems: Data backup solutions, disaster recovery plans. 2.
