

Company Profile 11: AutoDrive Technologies (Automotive Industry)

Quality Function

Quality	ID	Function Name	Function Description	Function Outcome
Excellent	RC.IP-1	Identify Critical Technical and Non-Technical Assets	AutoDrive Technologies must conduct a comprehensive discovery exercise to identify their critical technical and non-technical assets. Technical Assets include but are not limited to data centres, hosting services, servers, databases, data, software, models, and services. It is important to identify critical service components, as some services may have higher priority or sensitivity than others. Non-Technical Assets include but are not limited to people, processes, and intellectual property (IP). For example, safeguarding intellectual property and understanding how business processes can be restored in case of a cyber incident is critical to the business continuity of AutoDrive Technologies.	List of Technical Assets for AutoDrive Technologies:- Data Centres: Vehicle and fleet data processing centres.- Hosting Services: Cloud-based services for IoT integration.- Servers: 40 physical servers, 60 virtual servers.- Databases: Vehicle performance data stored on MySQL.- Data: Vehicle location data, diagnostics, maintenance logs.- Software: Autonomous driving algorithms, fleet management system.- Models: Predictive maintenance models, real-time navigation algorithms.- Services: Autonomous fleet management, smart navigation.- Networking and Infrastructure: 5G-enabled vehicle communication networks.- Security Assets: Data encryption, secure communication channels.- Development Tools: Embedded system development kits, simulation tools.- Communication Systems: Vehicle-to-vehicle and vehicle-to-infrastructure communication.- Compliance and Regulatory Reporting Systems: Systems for self-driving car regulatory compliance.- Business Continuity and Disaster Recovery Systems: Backup solutions, fleet recovery systems.
