

## Company Profile 13: BioMedics Inc. (Biotechnology Industry)

### Quality Function

| Quality   | ID      | Function Name                                        | Function Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Function Outcome                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Excellent | RC.IP-1 | Identify Critical Technical and Non-Technical Assets | <p>BioMedics Inc. must conduct a comprehensive discovery exercise to identify their critical technical and non-technical assets.</p> <p><b>Technical Assets</b> include but are not limited to data centres, hosting services, servers, databases, data, software, models, and services. It is important to identify critical service components, as some services may have higher priority or sensitivity than others.</p> <p><b>Non-Technical Assets</b> include but are not limited to people, processes, and intellectual property (IP). For example, safeguarding intellectual property and understanding how business processes can be restored in case of a cyber incident is critical to the business continuity of BioMedics Inc.</p> | <p><b>List of Technical Assets for BioMedics Inc.:-</b> Data Centres: Biotech research data storage.- Hosting Services: Cloud storage for research data and analysis.- Servers: 20 physical servers, 50 virtual servers.- Databases: Genomic data, clinical trials data.- Data: Patient data, clinical trial results, lab research data.- Software: Bioinformatics software, lab management systems.- Models: Genetic algorithms, disease prediction models.- Services: Genetic testing, biotechnology R&amp;D.- Networking and Infrastructure: Private networks for research sharing.- Security Assets: Data encryption, research protection protocols.- Development Tools: Biotech research platforms, analysis tools.- Communication Systems: Secure channels for collaboration with research partners.- Compliance and Regulatory Reporting Systems: Systems for FDA and other regulatory compliance.- Business Continuity and Disaster Recovery Systems: Research data backup and disaster recovery systems.</p> |
