

Company Profile 16: CodeBridge Solutions (Software Development & IT Consulting)

Quality Function

Quality	ID	Function Name	Function Description	Function Outcome
Excellent	RC.IP-1	Identify Critical Technical and Non-Technical Assets	CodeBridge Solutions must conduct a comprehensive discovery exercise to identify their critical technical and non-technical assets. Technical Assets include but are not limited to data centres, hosting services, servers, databases, data, software, models, and services. It is important to identify critical service components, as some services may have higher priority or sensitivity than others. Non-Technical Assets include but are not limited to people, processes, and intellectual property (IP). For example, safeguarding intellectual property and understanding how business processes can be restored in case of a cyber incident is critical to the business continuity of CodeBridge Solutions.	List of Technical Assets for CodeBridge Solutions:- Data Centres: Development environment data storage.- Hosting Services: Cloud platforms for customer applications.- Servers: 50 virtual servers for software development and deployment.- Databases: Customer and application data stored on PostgreSQL and MongoDB.- Data: Application logs, user data.- Software: Custom software development tools, project management software.- Models: AI-based predictive models for customer behaviour.- Services: Cloud-based software solutions, IT consulting.- Networking and Infrastructure: Secure VPN for client communication.- Security Assets: Firewalls, secure code scanning tools.- Development Tools: IDEs, code repositories (GitHub, Bitbucket).- Communication Systems: Slack, project management tools (Jira).- Compliance and Regulatory Reporting Systems: GDPR compliance tools.- Business Continuity and Disaster Recovery Systems: Backup systems for software projects.
