

Company Profile 18: NetVantage Solutions (IT Infrastructure & Network Solutions)

Quality Function

Quality	ID	Function Name	Function Description	Function Outcome
Excellent	RC.IP-1	Identify Critical Technical and Non-Technical Assets	NetVantage Solutions must conduct a comprehensive discovery exercise to identify their critical technical and non-technical assets. Technical Assets include but are not limited to data centres, hosting services, servers, databases, data, software, models, and services. It is important to identify critical service components, as some services may have higher priority or sensitivity than others. Non-Technical Assets include but are not limited to people, processes, and intellectual property (IP). For example, safeguarding intellectual property and understanding how business processes can be restored in case of a cyber incident is critical to the business continuity of NetVantage Solutions.	List of Technical Assets for NetVantage Solutions:- Data Centres: Network infrastructure hosting.- Hosting Services: Managed cloud hosting for client networks.- Servers: 75 physical and virtual servers for network services.- Databases: Client data on MySQL and NoSQL databases.- Data: Network performance metrics, client logs.- Software: Network monitoring tools, configuration management systems.- Models: Predictive models for network performance and downtime.- Services: Managed network services, IT consulting.- Networking and Infrastructure: Dedicated private networks, MPLS, SD-WAN.- Security Assets: Network firewalls, secure VPN connections.- Development Tools: Network simulation tools, configuration management platforms.- Communication Systems: Collaboration platforms for client network management.- Compliance and Regulatory Reporting Systems: Network regulation compliance (GDPR, PCI DSS).- Business Continuity and Disaster Recovery Systems: Network redundancy, backup solutions.

Quality	ID	Function Name	Function Description	Function Outcome
