

Company Profile 19: TechSolve IT (Custom Software Development & IT Support)

Quality Function

Quality	ID	Function Name	Function Description	Function Outcome
Excellent	RC.IP-1	Identify Critical Technical and Non-Technical Assets	TechSolve IT must conduct a comprehensive discovery exercise to identify their critical technical and non-technical assets.	List of Technical Assets for TechSolve IT:- Data Centres: Cloud-based hosting for applications and services.- Hosting Services: AWS and Google Cloud hosting.- Servers: 50 physical servers used for application hosting.- Databases: SQL-based client databases, NoSQL data stores.- Data: Client application data, business metrics.- Software: Custom web application frameworks, IT support tools.- Models: Workflow optimization models, predictive customer service models.- Services: Custom software development, IT support services.- Networking and Infrastructure: Cloud storage and networking.- Security Assets: Endpoint security, encryption tools.- Development Tools: Integrated development environments (IDEs), code management platforms.- Communication Systems: Internal communication tools, client chat platforms.- Compliance and Regulatory Reporting Systems: Security compliance systems.- Business Continuity and Disaster Recovery Systems: Backups, cloud failover systems.
			Technical Assets include but are not limited to data centres, hosting services, servers, databases, data, software, models, and services. It is important to identify critical service components, as some services may have higher priority or sensitivity than others.	
			Non-Technical Assets include but are not limited to people, processes, and intellectual property (IP). For example, safeguarding intellectual property and understanding how business processes can be restored in case of a cyber incident is critical to the business continuity of TechSolve IT.	

Quality	ID	Function Name	Function Description	Function Outcome
