

Company Profile 2: HealthCare Plus (Healthcare Industry)

Quality	Function ID	Function Name	Function Description	Function Outcome
Excellent	RC.IP-1	Identify Critical Technical and Non-Technical Assets	HealthCare Plus must conduct a comprehensive discovery exercise to identify their critical technical and non-technical assets. Technical assets include but are not limited to data centres, hosting, servers, databases, data, software, models, and services. It is important to include 'service' as a whole because some services are more important than others. Non-technical assets include but are not limited to people, processes, and technology. For example, it is crucial to identify critical business processes, such as the Intellectual Property (IP) of the company, understand how it is safeguarded, how it can be reproduced in the event of a disaster, cyber incident, or attack, and identify any safeguards and potential weaknesses in those safeguards (see also RC.CC-1).	List of Technical Assets for HealthCare Plus: - Data Centres: Primary data centre for patient records and medical data. - Hosting Services: HIPAA-compliant cloud hosting services. - Servers: 20 physical servers and 100 virtual servers. - Databases: Patient and treatment databases hosted on Oracle and MongoDB. - Data: Patient records, treatment data, research data, and analytics data. - Software: Electronic Health Record (EHR) systems, medical billing software, custom-built patient management applications. - Models: Predictive models for patient outcomes, healthcare analytics models. - Services: IT support services, healthcare data analysis services, telehealth services. - Networking and Infrastructure: Secure network infrastructure, VPN services for remote access. - Security Assets: Firewalls, intrusion detection systems, encryption tools. - Development Tools: Medical software development kits (SDKs), version control systems (e.g., GitHub), CI/CD pipelines. - Communication Systems: Secure email servers, collaboration tools (e.g., Microsoft Teams), VoIP phone systems. - Compliance and Regulatory Reporting Systems: Systems for monitoring HIPAA compliance. - Business Continuity and Disaster Recovery Systems: Data backup solutions, disaster recovery plans. 2. List of Non-Technical Assets for HealthCare Plus: - People: Key personnel including the CEO, CIO, lead medical informatics experts, and IT support staff.

Quality	Function ID	Function Name	Function Description	Function Outcome
