

Company Profile 20: ByteNet Solutions (IT Infrastructure Management & Cloud Services)

Quality Function

Quality	ID	Function Name	Function Description	Function Outcome
Excellent	RC.IP-1	Identify Critical Technical and Non-Technical Assets	ByteNet Solutions must conduct a comprehensive discovery exercise to identify their critical technical and non-technical assets. Technical Assets include but are not limited to data centres, hosting services, servers, databases, data, software, models, and services. It is important to identify critical service components, as some services may have higher priority or sensitivity than others. Non-Technical Assets include but are not limited to people, processes, and intellectual property (IP). For example, safeguarding intellectual property and understanding how business processes can be restored in case of a cyber incident is critical to the business continuity of ByteNet Solutions.	List of Technical Assets for ByteNet Solutions:- Data Centres: Private cloud infrastructure for clients.- Hosting Services: Multi-cloud hosting solutions (AWS, Azure).- Servers: 120 physical servers for hosting and client management.- Databases: MongoDB and SQL-based databases for client data.- Data: Client data, application performance data.- Software: Cloud management tools, backup solutions.- Models: Cloud resource optimization algorithms.- Services: IT infrastructure management, cloud services.- Networking and Infrastructure: Cloud-based network solutions, SD-WAN.- Security Assets: Identity and access management (IAM) tools.- Development Tools: Cloud integration platforms, containerization tools (Docker, Kubernetes).- Communication Systems: Remote management platforms.- Compliance and Regulatory Reporting Systems: Cloud security and compliance management.- Business Continuity and Disaster Recovery Systems: Cloud backup and redundancy systems. List of Non-Technical Assets for ByteNet Solutions:- People:
