

Company Profile 4: FinancePro (Financial Services Industry)

Quality	Function ID	Function Name	Function Description	Function Outcome
Excellent	RC.IP-1	Identify Critical Technical and Non-Technical Assets	FinancePro must conduct a comprehensive discovery exercise to identify their critical technical and non-technical assets. Technical assets include but are not limited to data centres, hosting, servers, databases, data, software, models, and services. It is important to include 'service' as a whole because some services are more important than others. Non-technical assets include but are not limited to people, processes, and technology. For example, it is crucial to identify critical business processes, such as the Intellectual Property (IP) of the company, understand how it is safeguarded, how it can be reproduced in the event of a disaster, cyber incident, or attack, and identify any safeguards and potential weaknesses in those safeguards (see also RC.CC-1).	List of Technical Assets for FinancePro: - Data Centres: Primary data centre for financial data and customer information. - Hosting Services: Cloud hosting services provided by AWS and Microsoft Azure. - Servers: 20 physical servers and 100 virtual servers. - Databases: Customer, financial, and transaction databases hosted on Oracle and MongoDB. - Data: Customer data, financial data, transaction data, and analytics data. - Software: Financial management software, trading platform software, custom-built financial applications. - Models: Risk assessment models, financial forecasting models. - Services: IT support services, financial data analysis services, cybersecurity services. - Networking and Infrastructure: Secure network infrastructure, VPN services for remote access. - Security Assets: Firewalls, intrusion detection systems, encryption tools. - Development Tools: Financial software development kits (SDKs), version control systems (e.g., GitHub), CI/CD pipelines. - Communication Systems: Secure email servers, collaboration tools (e.g., Microsoft Teams), VoIP phone systems. - Compliance and Regulatory Reporting Systems: Systems for monitoring and reporting compliance with financial regulations. - Business Continuity and Disaster Recovery Systems: Data backup solutions, disaster recovery plans. 2. List of Non-Technical Assets for FinancePro:
