

Company Profile 6: HealthTech Innovations (Healthcare Technology Industry)

Quality Function

Quality	ID	Function Name	Function Description	Function Outcome
Excellent	RC.IP-1	Identify Critical Technical and Non-Technical Assets	HealthTech Innovations must conduct a comprehensive discovery exercise to identify their critical technical and non-technical assets.	List of Technical Assets for HealthTech Innovations:- Data Centres: Healthcare data storage and processing centres.- Hosting Services: HIPAA-compliant hosting services.- Servers: 20 physical servers and 80 virtual servers.- Databases: Patient medical records and research data stored on SQL Server and PostgreSQL.- Data: Patient data, clinical trial data, medical imaging.- Software: Electronic health records (EHR), telemedicine platform.- Models: Predictive healthcare models, AI-driven diagnostics.- Services: Telemedicine, medical support services.- Networking and Infrastructure: Healthcare network, telemedicine services.- Security Assets: Encryption, firewalls, HIPAA-compliant systems.- Development Tools: Medical software development kits (SDKs), version control systems.- Communication Systems: Secure messaging, video consultation tools.- Compliance and Regulatory Reporting Systems: Tools for HIPAA compliance tracking.- Business Continuity and Disaster Recovery Systems: Disaster recovery for critical health data.
			Technical Assets include but are not limited to data centres, hosting services, servers, databases, data, software, models, and services. It is important to identify critical service components, as some services may have higher priority or sensitivity than others. Non-Technical Assets include but are not limited to people, processes, and intellectual property (IP). For example, safeguarding intellectual property and understanding how business processes can be restored in case of a cyber incident is critical to the business continuity of HealthTech Innovations.	List of Non-Technical Assets for HealthTech Innovations:- People: Medical professionals, health IT specialists,

Quality	ID	Function Name	Function Description	Function Outcome
				developers.- Intellectual Property (IP): Medical research software, diagnostic algorithms.- Business Processes: Patient care workflows, research protocols.- Technology: Medical devices, telehealth infrastructure.
