

Company Profile 9: GreenEnergy Solutions (Renewable Energy Industry)

Quality Function

Quality	ID	Function Name	Function Description	Function Outcome
				List of Technical Assets for GreenEnergy Solutions:-
			GreenEnergy Solutions must conduct a comprehensive discovery exercise to identify their critical technical and non-technical assets.	Data Centres: Energy management data processing centres.- Hosting Services: Cloud hosting services with Amazon Web Services (AWS).- Servers: 15 physical servers and 40 virtual servers.- Databases: Energy production and consumption data stored in Oracle.- Data: Energy usage data, solar panel performance data, customer data.- Software: Energy management software, optimization algorithms.- Models: Energy forecasting models, performance analysis models.- Services: Renewable energy consultancy, smart grid services.- Networking and Infrastructure: Secure network infrastructure for smart grid communication.- Security Assets: Firewalls, encryption protocols for data protection.- Development Tools: Green tech software development kits (SDKs), CI/CD tools.- Communication Systems: Secure communication networks for monitoring systems.- Compliance and Regulatory Reporting Systems: Systems for compliance with energy regulations.- Business Continuity and Disaster Recovery Systems: Energy data
Excellent	RC.IP-1	Identify Critical Technical and Non-Technical Assets	Technical Assets include but are not limited to data centres, hosting services, servers, databases, data, software, models, and services. It is important to identify critical service components, as some services may have higher priority or sensitivity than others. Non-Technical Assets include but are not limited to people, processes, and intellectual property (IP). For example, safeguarding intellectual property and understanding how business processes can be restored in case of a cyber incident is critical to the business continuity of GreenEnergy Solutions.	

Quality	ID	Function Name	Function Description	Function Outcome
				backup solutions, emergency recovery plans.
				List of Non-Technical Assets for GreenEnergy Solutions:- People: Engineers, analysts, field technicians, consultants.- Intellectual Property (IP): Solar panel design methodologies, energy optimization algorithms.- Business Processes: Energy audits, grid management processes.- Technology: Solar power generation equipment, energy monitoring sensors.
