

Company Profile 20: StellarEd Ventures (Space Technology Industry)

Quality Function

Quality	ID	Function Name	Function Description	Function Outcome
Good	RC.IP-1	Identify Critical Technical and Non-Technical Assets	StellarEd Ventures should identify their critical technical and non-technical assets.	Technical Assets: - Data Centres: Space exploration data centres. - Hosting Services: Cloud hosting for satellite data processing. - Servers: High-performance space simulation servers. - Databases: Satellite telemetry, mission logs, and experimental results. - Data: Real-time space data, astronomical research datasets. - Software: Orbital simulation tools, spacecraft management platforms. - Models: Spacecraft trajectory predictors, material stress simulators. - Services: Satellite data analysis, mission control support. - Networking and Infrastructure: Secure satellite communication systems. - Security Assets: Encryption protocols, secure ground station systems. - Development Tools: Aerospace engineering software, CI/CD tools. - Communication Systems: Mission communication platforms, satellite ground link tools. - Compliance Systems: Space regulation and safety monitoring. - Disaster Recovery Systems: Backup ground stations, mission recovery protocols. Non-Technical Assets: - People: Aerospace engineers, mission controllers. - Intellectual Property (IP): Proprietary spacecraft designs, mission optimization algorithms. - Business Processes: Satellite manufacturing workflows, mission planning strategies. - Technology: Advanced propulsion systems, ground station equipment.
